EXAMINER'S ACTION

Art Unit: 3727

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 - 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adell.

The container dimensions, material of construction, and number of containers fittable within a box are obvious matters of choice with the device of Adell. To have employed injection blow molding in the construction of the device of Adell would have been obvious to one of ordinary skill in the art in view of the wide acceptance of such in the plastic container field. The method claimed would have been an obvious method for the above set forth device in view of the intended use.

3. The references to Arvidson, et. al., Singier, Harbour, and Dyer have been cited to further show related structure.
